

## Welcome to HD Athletes!

HD Athletes is dedicated to providing college bound student athletes with the opportunity of earning an athletic scholarship through improving evaluations and enhancing ability.

Many athletes have limited exposure to college recruiters because they are from small schools, get over-looked, are not known, do not have college connections, etc. The reasons are unlimited.

HD Athletes provides athletes with a brand that is recognized and accepted at the college level and brings athletes to coaches in High Definition! The excitement over and benefit of HD Athletes is that an athlete does not have to rely on the low-probability promises of a recruiting service. HD Athletes brings athletes to coaches in High Definition so that evaluations can be made accurately and are tailored to an evaluator's specific need. The better an athlete performs at an HD Event, the greater the likelihood that athlete will EARN A COLLEGE SCHOLARSHIP! Athletes control their destiny!

The HD process enables coaches, evaluators, recruiters and scouts to have a personal workout with every HD Athlete in order to accurately assess the athlete's ability. The HD process makes colleges accountable for deciding whether to recruit the athlete by providing them with the concrete information they need in HD. Each college and athlete benefit by not settling for the persuasion and ineffective "chances" that are provided by fly-by recruiting services!

HD Athletes has evolved from the need for colleges to evaluate, recruit and offer scholarships to the highest caliber athlete possible in order to compete year after year. Based on this need, the only medium that works is High Definition. Many recruiting services simply "chance" an athlete's future by listing the athlete's bio and stats in the hopes that a college coach would randomly stumble across the bio, believe the stats and start recruiting that athlete.

An even more recent trend has been for recruiting services to create personal webpages that have game film and highlight clips streamlined on the Internet. There are several problems that these services face including: credibility of listed statistics; excessive time to load a video; low quality video making evaluations difficult to perform; must pay for a subscription to view the videos; and more.

Don't leave your future to a game of "chance", it is time for you to take control and EARN A SCHOLARSHIP!

Get in HD!
